CAUTION: DO NOT open the lid during brewing as there is the potential risk of scalding.

1. Put the plug into the power socket.
2. Move the switch to **I**. The light will come on.

BREWING STATUS GAUGE

The gauge shows the status of your coffee machine.

- The pointer will first show the brewing stage as your coffee is being made. The pointer will move slowly clockwise within the first (long) segment during brewing.

- Once brewing has finished, the pointer will move to the **0** marking. It will then show, in minutes, how long the coffee has been kept warm by the hot plate (0 to 40 mins). After about 40 minutes, chemical changes will affect the taste of the coffee.

- When the appliance shuts down, the pointer will move to the rest position.
